

## Supplier Link

With more and more suppliers providing product-related material electronically, today's distributors face a growing need to manage this flow of data into their systems. Supplier Link provides distributors with the ability to accept the wealth of information available and manipulate it to their specifications. Using the latest data from suppliers or Trade Service Publications, SX.enterprise's Supplier Link assures that product and pricing information is accurate and up-to-date.

Accept the wealth of information available and manipulate it to your specifications
